### What about me?

I am delighted to be of service to humanity irregardless of the role I take on. My life journey so far has given me its fair share of challenges and wonderful experiences. My career of more than 20 years of experience in human resources management, invariably led to life coaching and then to discover my spiritual role as a Holistic Healing Facilitator and Teacher. The many years of managing and working with people have led me to affirm that we are all empowered and gifted to determine how we want our life to be right now. I began to appreciate my life and am thankful for the great compassion that is omnipresent. My heart feels gratitude toward every moment of my life and I embrace love and light always.

My spiritual journey began in my early years, though like most people, I wasn't even aware of it then. Ever since I can remember, I have always been rather sensitive to my environment and space around me; picking up vibes and energy that either makes me happy or apprehensive. I take it as my intuitive self guiding me along as I carry out my daily living. Over the years, the sensing greatly increased and finally, I decided to discover what it was all about.

Spirituality, for me, is about being whole; being aware of who we are in the larger order of things and what our life purposes are, and how we serve the greater good. I look at life in awesome wonder. I always wonder about God, the Creator and the "to go where no one has ever been before". Yes, I am a Star Trek fan and space, the universe, how our mind functions, and such things have always fascinated me. I like puzzles not the crossword kind but rather how things are put together. I sense I have a great mission to accomplish in my life. What is it besides living morally, being successful in one's career, and having a loving family, etc? Having the opportunity to travel regularly and living abroad has open my view to the fact that people are similar everywhere you go irrespective of race, culture or religion. Everyone is as friendly as you wish to be or as distant as you wish to be. I am grateful for the opportunity to have met wonderful people from diverse background whom I call friends.

### **Angelic Reiki - Most Profound**

In my journey, I am guided to search for wholeness and alternative holistic healing methods. When I encountered Angelic Reiki, it affirms my knowing that God is Love most wonderful and the Divine is accessible and within the very core of us. It affirms that in the hands of the Creator everything is possible and nothing

is lost. The angels are truly great messengers of love and light. To experience Angelic Reiki is to awaken to Divine energy that emanates within and without us.

Come and experience Angelic Reiki for yourself and discover the gifts that have been closed from you as a result of human dogma. The benefits of Angelic Reiki are found in the pages within [www.angelicreiki.com.sg](http://www.angelicreiki.com.sg).

Call me for a personal consultation whether you are experiencing imbalances in your career, relationship or other areas that place you at the crossroads of life. Ultimately, the root to all problems and dis-ease began and can be traced to have begun in our energetic body; for we are all energy. Everything around us is energy – vibrating at different level and frequencies.

While I am an Angelic Reiki Practitioner and Teacher, I also conduct Angel Guidance Therapy, Mystic Rose Healing, Kwan Yin and Dolphin Energy Healing, Spiritual Surgery, Hypnotherapy and NLP (Neuro Linguistic Programming). I am guided to use any of these healing modalities during a session. I listen to my higher self and the wisdom from the Angelic Realm and conduct all session for the best possible outcome for my client and with the highest intention and for the highest good.

I may also incorporate the use of crystals in my sessions. I have found crystals to be effective in harmonizing our energetic body and have much respect for the loving and beautiful energy that they unconditionally share.

I treat all clients' cases with utmost confidentiality and proprietary.

### **Spot Check**

Just like our home, car and appliances, we require regular maintenance and servicing to ensure that everything is going smoothly and trouble free. It includes relationships that are important to you. Have you done a spot check on your self? I encourage everyone to examine where they are in their soul journey and be discerning of the choices you make every moment in life. You may not realize that all these simple and complex decisions are affecting your daily and future circumstances. For instance, are you happy now? You have a choice.

### **Green Energy Exchange**

Everything is a cycle. To give is to receive. Thus, it is that I charge a consultation fee of **S\$120.00 – S\$180.00 per session**. Each session may take 45 to 90 minutes depending on the healing modality applied.

### **Make an Appointment**

An appointment is necessary to ensure that each client receives a focused and beneficial session. Call me at **+65 63230023, +65 68370028** or email [Cynthia@angelicreiki.com.sg](mailto:Cynthia@angelicreiki.com.sg) to set an appointment date for a personal consultation.
