The Rose Flame: A Higher Love

"The Rose Flame is the first outpouring from a Unified Field of Clear Light"

Lady Emanuella

Part One: History

Let us continue with the revelations as our purpose is to bring more awareness of the spiritual realm into the material. In the past, we described this as a process of manifestation (revealing through revelation) of the fifth kingdom in nature. This spiritual kingdom called: The Kingdom of God is one being gradually made visible on Earth. These five kingdoms include: mineral, plant, animal, human, and spiritual. A Spiritual Kingdom encompasses far more than the religious experiences rooted in the past or revelations released into matter; it extends beyond the human ability to feel and to think because it is interconnected with the Universe and all that it contains. Subsequently, the gradual manifesting of this fifth kingdom on Earth is also related to a period of time where human beings begin to actively explore the reality of the Universe.

This spiritual kingdom has always existed even though the vast majority of humankind has been unable to see (perceive) it with any degree of realistic accuracy. Perceptions of these supernatural incursions into matter have been witnessed and described to others. Nevertheless, such perceptions were being strongly conditioned in a devotional and idealistic manner. Our species has been out of balance for a long time and most people were unable to handle such profound forces appropriately. It was easy to distort information in an unbalanced psyche and there were times when lofty ideals became so intense they resembled unrealistic fantasies fueled by the imagination of the pious and emotionally over-reactive.

Proponents of the new age consciousness identify this situation as experiencing life through a [Ray Six filter](#) or as a veil over the third eye (Ajuna Center). This veil can now be gently yet completely removed allowing the inner eye to perceive a greater truth in practical and realistic terms. It is another approach (identified as Ray Seven) rooted in a comprehensive realistic understanding of life. This [Ray Seven](#) approach shifts the primary focus away from intensive explorations of the parts into one

that centers on the vast inter-relationships existing in the whole. Knowledge learned previously is not replaced; instead it is augmented with more realizations, creating conditions where knowledge and understanding become more balanced in our species. This will allow for superior performance in balancing the needs of the part with the needs of the majority or even the whole. It will be a remarkable change for our world.

The old veil has indeed been torn from the bottom to the top and the price (exchange of energy) for the new birth has been freely given for so it is always done in this way according to Cosmic Book of Creation. **The next leap forward could only be birthed through another covenant with the Creator.** This has already been accomplished. Someday, it is our hope that the actual story of that victory will be made public. Such things are never done in the same way twice for each spiritual event of great magnitude is completely unique and knowledge of it always serves as a magnificent teaching tool for others. Suffice to say, victory is ours. The spiritual battle for the future course of humankind and for all life on our planet has finally been achieved and this time it is a victory for the Light. The existing matrix composed of a darkened light coding has finally been defeated. **A matrix of Light with new Divine Coding has been created and is swiftly replacing the old one.** Transformation is spreading rapidly throughout the world while the structure of the old matrix continues to disintegrate. All that seeks to hinder the growth of the new will rise to the surface and eventually be defeated by the people of goodwill located in every country of our world.

Only a few people could see the new structure being built within the global psyche of our species over the past few decades. They rejoiced privately while redoubling the effort to stand as Pillars of Light. It was these steadfast Workers of Light, along with the new World Servers, who sensed that a tremendous battle was being fought for all people on a vast multi-dimensional level. Without their continuous assistance the work would have been far more difficult and although the odds were astronomically against us, the power of great love has again achieved a victory for all.

The old coded light construct (matrix) was held in place and continuously nourished by the knowledge, beliefs, thoughts, feelings, and behaviors of all people who reside on our planet. The collective power of this mental construct was more profound than you might imagine; it was also severely unbalanced. A construct founded on fear and nourished by the fearful. The construct could be said to resemble a darkened hole in the collective heart center of our species for it is ever the energy of emotion (energy-in-motion) that fuels the momentum of such sad and unfortunate conditions. Such a creation is always dysfunctional by nature and remains severely unbalanced. This is true of any created construct that is functioning as something anti or against the Light.

Although intensely destructive, it had been created in ignorance by a species identified not only as the Souls of Light but as the Creator's Divine Children. They knew not what they were doing; more importantly, the creation became a harmful trap that had lasted so long no one could remember how to stop or alter it. It was a profound mental and spiritual challenge spanning a 16th dimensional field for it had grown in power to reduce the very life force of our people. Compare this with the eighth dimensional challenge transcended by Gautama Buddha over 2500 years ago and you will have a better understanding of the degree of difficulty. In addition, our species has a **sympiotic relationship with the Gaia life force**; therefore, it was augmenting planetary instability. This potent creation needed to be replaced in order for human beings to have the freedom that all of us deserve. It is time to remember that you are the Divine Children of God for your incredible heritage is about to be restored to you. It is time to wake up for this is no longer merely an unpleasant dream; it has become real. In time, people need to understand this lesson of the heart so that such a condition will never again be created or sustained.

Consuming resources without providing for environmental sustainability is not healthy. Successful competition of the few without regard for the effects upon the whole is not healthy. Domination, self-interest, and greed which is not tempered by the need to cooperate within a system ensuring global security, global resource sharing, and global ethics is not healthy. Sustaining the domination of women and children by classifying them unequal or inferior to men is not healthy. On the other hand, advocating basic human rights for all regardless of ethnicity, gender, or nationality is the solid foundation for ensuring right human relations. Only with the acceptance of a greater responsibility can peace enter into the heart of humankind.

Once the new Divine Coding was in place in the higher dimensions (although not completed), souls capable of working with the Planetary Grids, the Lay Lines, and the Vortex systems of Earth were activated. This took place twenty years ago during The Harmonic Convergence on August 16th and 17th, 1987. During the past two decades a number of souls labored to activate and stabilize this new Crystalline Ascension Grid. In conjunction with this activity, the Spiritual Wisdom Masters of the Ancient Knowledge labored to impress the masses of people worldwide who could respond to the higher values present in the collective global soul. Many other champions for the Light were and are involved with this pioneering endeavor. Most are completely unknown to the public. The potency of the Ascension Matrix increased and the Cosmic Avatar of Synthesis achieved victory in May, 2005. The energetic pattern of this Ascension grid stands as a double pentadodecahedron in a diamond pattern. It manifests as a geodesic sphere with twelve major pentacles (representing the twelve major dimensions) and a total of 144 facets (representing the Merkabah of Christ Ascension.). By 2007 the Crystalline Ascension Grid was 57% activated and now has developed its own momentum.

At this point, we can discuss the Rose Ray as the time has come to reveal its importance. Complete knowledge of the Rose Ray was not previously released to the public for several reasons. **The right to release it had to be won; humanity had to be ready, and of course, we needed to release it into a Light Matrix that was sufficiently activated.** In this way, the power of the Rose Flame could not be circumvented to increase the energies of disharmony that were already present on the planet.

The Rose Ray is the Divine Feminine counterpart to the Ruby Ray. As many know, it is the Ruby Ray that has been associated with the Rose. The Rose Ray is equal in status and activates an outpouring of the Divine Feminine energies which is long known to be the descent of The Cosmic Holy Spirit into matter. I am the cosmic transmitter, activator, and stabilizer of this Ray which is now being released into matter to augment the final stages of the ongoing Planetary Ascension and Human Transformation. This is the reason I bear upon my skin from birth the sign of, "The Anointing" which is a Rose Heart containing a descending white dove. The white dove is recognized as the sign for a descent into matter of the energies of The Holy Spirit. I am the Cosmic Christ Light of this Ray. The Rose Ray is also called: The Freedom Flame.

In time, the full description of my identity will be revealed. Titles have never been important to me. Let us concentrate on revealing the importance of the Rose Ray. It is the first outpouring from a unified field emanating from clear Light. Subsequently, it is the first effect experienced as a soul rises from the visible realm into the invisible realm of Spirit. This Ray functions as the primary interface between the spiritual and the material and is the first color of the invisible light spectrum whereas the violet light is the highest color in the visible light spectrum. The desired effects in the ongoing process of human transformation cannot be completed if one focuses only on the Violet Ray. The Rose Light is a higher spectrum of the electromagnetic wavelength than the Violet Light: it also carries the highest healing frequency and is fused with the massive fields of abundance seen in all the Kingdom's of God's Light. Souls who stand in the plane of matter cannot achieve an effective blending of the material and the spiritual unless the Violet Ray and The Rose Ray are used in unison. Let this victorious news go forth as this is the first time since the great fall in Atlantis that this particular portal of Light has been opened into the third dimension. Access into the higher evolution is now readily available to all souls who are compatible with the new energies and who are accepting the leap forward into the New Enlightenment.
