The Rose Flame: A Higher Love

"The Rose Flame is the first outpouring from a Unified Field of Clear Light"

Lady Emanuella

Part Two: Function

Today we have those souls who can accept increased responsibility for the healing of self, others, society, and the planet. They are focused on equitable human rights, fairness in the workplace, justice, the end of hunger, the removal of suffering, and the re-stabilization of our planetary environment. Behind such focused intent lie caring hearts desiring to find some way to lift a great burden of suffering from the people of the world.

Regardless of location, we walk the plane of matter together at this point in time and space. Now comes forth a moment where we can do something together as one family with a collective heart of love. We can manifest together a Unified Field of Healing throughout this world. Such a field of power can only be activated by 'tuning in' to an intensity of higher love. Through God's Great Mercy, the energy of Infinite Love is now anchored on this planet. It is intensity so powerful that it can access the power of Cosmic Holy Spirit and bathe this world with a massive outpouring of Healing Energy and Abundance. This portal of Light has not been opened on Earth for a very long time; it was closed long ago when the darkness of ignorance began to consume the land.

In order to anchor a higher intensity of love into an area of density, the Creator requires an exchange of energy to be given for all those who have not yet evolved to this level. It has been an honor for me to walk once again among the Creator's Divine Children and give the required energy for this victory in humanity's name. My love for humanity is one that has never died and will never die for it lives as Eternal Life and is Infinite without end. It is my family as well and for me family is everything. Thus, I was qualified to bring this profound intensity into the dense "air" of Earth. I have labored through time, space, and

dimension to complete the exchange of energy required by our Creator. This exchange was gladly given and after many years it finally has been accepted by God as sufficient.

Hope, imagination, dreams, and visualizations are merely energetic images. Without the power to actualize them into reality, such images cannot become atoms vital enough to coalesce into form. They will remain unmanifest as part of infinite potential. The greatest spiritual power in existence is Love with all its varying complexities and intensities. We could release the awareness of new wavelength colors, new energetic creation patterns, or new invocations. Yet, without the power available to energize these images into concrete reality, the new cannot be created as intended.

The new Crystalline Light Network (Enlightenment Matrix) has been created in Divine Partnership and presently surrounds this planet. It has two balanced Quantum Light Fields, each with its own single polarity, each with twelve pentacles that are joined to create the complete double pentadodecahedron. The two polarities (one in each field) exist in continuous harmony, sustaining the entire unified Universal Field. Each polarity is corded successfully into the planet. Once the current structure is no longer required, it will dissolve and another structure will become dominant. The present crystalline matrix is encoded with the appropriate evolutionary Divine Coding. It is 57% activated, and this has been done by the persistent labor of many energetic activators present throughout the world. Activation is proceeding, and the creation is now holding its own vibration. The Violet Flame is being widely used by Lightworkers for the transmutation of dense energies and the gradual raising of frequency in the bio-electromagnetic and quantum fields. The potency of Infinite Love has been anchored into the planet and into the bio-electromagnetic field and now the incredible power of the Rose Flame is manifesting. In addition, the psychological components of the new Light Matrix have been co-created in partnership between the Avatar of Synthesis and God's WILL.

For some time now, a special cosmic energy pattern which holds a pattern resonance with our particular solar system, has been conditioning all those who are working with the incoming Aquarian energies. This pattern is from Sirius; it is not from the Pleiades. It is a pattern the Ascended Wisdom Masters in Earth's Council of Light knows very well. Holding this vibrating cosmic

Onhi

One World Heart Institute

pattern has meant hardship for all Aquarian spiritual workers of Light as it functioned as an **intense contraction** field assisting them to hold a high frequency. It has been an uncomfortable experience for most of them. Nevertheless, this part of the plan for global transformation has been absolutely necessary. For most, it was like holding their breath for a long time and never being able to exhale fully and completely. Our collective effort has been quite strenuous. We owe each and every one a debt of gratitude, for in most cases, they faithfully held this pattern without understanding what was happening. This pattern has been held by them in order that another corresponding expansion momentum could condition the general population of the planet. Bear in mind, it was strenuous as well for all those souls who permitted themselves to experience this intense rapid **expansion pattern**. We had to hold different solar energetic patterns as this was necessary to slow the continuing deterioration of Earth while we worked towards our spiritual victory.

Holding this type of solar pattern has been a hardship as it is not as comfortable as many other patterns. The deteriorating environmental conditions had accelerated and this required all of us to hold this pattern for much longer than what was originally anticipated. It is quite intense but has the advantage of producing results more rapidly. The most welcome news is that this contraction pattern is now changing and all Aquarian Avatars, Aquarian Wisdom Masters, World Servers, Lightworkers, and Aquarian Disciples are shifting to hold another specific expansion pattern. This one is very compatible with all who have raised their frequency and are now vibrating in harmony with the Crystalline Enlightenment Grid and it will serve to enhance their influence as well as their ability to manifest desired goals. A corresponding complementary contraction pattern will now condition the populations of the world, increasing their frequency and activating many more to become World Disciples.

More details of our joint rescue plan to ascend the planet and transform the souls of Earth into greater Light, Love, and Life can now be revealed. Many additional details are threaded throughout the various Bios of the [Ascended Masters](#) on this website.

Let us return to the importance of the Rose Flame. In the field of quantum physics, matter was found to have both wave and particle properties. If we transition this activity to the subject of human consciousness, we find that different electromagnetic fields generate a greater ray action or a greater field action. It is the electromagnetic fields which have the most impact on developing human consciousness, and as such, specific wavelength colors and certain frequency impressions sent into the bio-field can be absorbed by souls who share similar goals. Both the ray and the field are always present, although they do shift at times, periodically manifesting more rays (particle) or more field (wave) function.

Note: LEARNING ABOUT ENERGY CAN EVENTUALLY LEAD SOULS TOWARD THE HIGHER DIMENSIONS OF SPIRIT. SPIRIT OVERLAPS OR OVERLAYS WHAT PHYSICISTS REFER TO AS "ENERGY." IN THE PAST THE WORD SPIRIT WAS ALSO CALLED THE OVERSOUL.

The Violet Ray in human beings exerts more of a particle effect and it is the highest wavelength in the visible light spectrum. In contrast, the energetic field of the Rose Flame exerts more of a wave effect in humanity. The ray and wave function is always present in both, although, the qualitative effect is certainly different in each of these Lights. Rose is the first color wavelength in the invisible light spectrum (Spirit) that can be accessed by human souls. **The Rose Flame has the highest healing frequency and it is the color found in the sacred [Three-Fold Flame](#) located in the core of the heart center.** The function of the Rose Flame is also associated with the Freedom Flame; it has the ability to liberate souls with the power of intense love.

The Violet Ray combined with the Ruby Ray of the first chakra produces the color pink in the Three-Fold Flame. This is the color perceived by souls who have not yet transcended duality and function consciously in the world of Spirit. The Ruby Ray of the first chakra combined with the pure White Light found in the core of the soul star produces the color Rose in the heart center. Rose is not red, nor is it pink. Rose is the color identified in the sacred Three-Fold Flame of the heart when the soul has blended into the level of Spirit and knows it is a spiritual being having a form life experience. The soul can then easily access the higher dimensions of Cosmic Spirit or the advanced Kingdoms of Light. In order for the soul to achieve this level of being, **it must have become proficient at resolving duality into harmony**. A soul, who has gained a good deal of experience in transforming conflict (present in all dualities) into harmony, will be able to enter into the higher dimensional spaces of Spirit causing the previous color pink to transform into rose. Transforming dualities into harmony means the soul has developed the ability to remove conflict from a situation by revealing a higher truth or a higher understanding previously unknown to all parties involved in the conflict. The ability to do this means the soul has developed wisdom and is learning how to tap into the Infinite Perception found freely in the more evolved Kingdoms of Light. The presence of spiritual wisdom always denotes advanced understanding. With this information, one can see how the function of the Violet Flame has more of a transmuting effect whereas the function of the Rose Flame has more of a transforming effect. One transmutes while the other transforms. One connects you spiritually to specific areas of Cosmic Life while the other blends you into harmony with vast interconnected fields of Cosmic Light and Life and all that this implies. This form of Light brings forth a massive change to the human psyche.

Note: Infinite Love is the core intention and foundational state of being that nurtures all healing, growth, and transformation in the realms of Spirit. It is the essential common denominator present in the vast Universal mega-fields of the Spirit Light.

How can invoking the Rose Flame somehow interact with the energy of Infinite Love now anchored to the third dimension and to the human bio-electromagnetic field?

How will souls invoking the Rose Flame be creating a Unified Field of Healing and a massive outpouring of miraculous healing energy into the civilization?

Healing involves a compatible resonance. Energy will be moving between two polarities creating one single unified field. Visualize two tuning forks of the same size and structure, when one is struck, the other will spontaneously vibrate as well. When two processes are in resonance, they are in tune with one another. The intensity of Infinite Love and the Rose Flame are in resonance with one another. Invoking the Rose Flame will also evoke the power of Infinite Love creating a unified field of the

Onhi

One World Heart Institute

highest healing frequency that can exist for human beings. When numbers of people invoke the Rose Flame of Freedom in their geographic locations, it will manifest a Unified Healing Field of various intensities and the spontaneous healings will begin to occur. As the Crystalline Enlightenment Grid reaches additional activation, creating this "Outpouring of Miracles" will become easier. Souls of Light do not waste this opportunity! Entire populations on our world are drowning in a sea of suffering. Souls can begin to experience healing now. This type of unified spiritual field can bring forth healings of a physical, etheric, emotional, mental, or spiritual nature. **COME FORTH NOW AND BE PART OF LIFTING THE BURDEN OF SUFFERING FROM HUMANKIND.**

Hearts of Love! This action requires no money. It requires only the presence of a willing heart. Take upon your shoulders the mantle of a Cosmic Christ Light and learn to function as the Water Bearer that dispenses the waters of living life. Begin the invocations to the Rose Flame and let this creation of a global field of healing replace the old trauma fields of Earth.

Use the invocations at a **slower momentum** than what was used with the Violet Flame. Use nurturing energy rather than dynamic energy which was used when invoking the Violet Flame. Surround yourselves with this healing Light, pour out the Rose Flame upon all, and love this world into greater life.

Together, as One World Heart, let us build this global field of miracles and lift many up ONHI. Join with us---say the invocations. We have included all these invocations to the Rose Flame on our website. The corresponding ceremony can be obtained from our International Coordinator, Jan Coll at sanctuary@onhi.org

The Truth cannot be contained adequately by any word whatsoever.

Yet the Truth can be lived. Then and only then, does it become real.

Our Eternal Love flows into you,

Lady Emanuella with the Ascended Wisdom Masters
